" Ligne Roset is synonymous with modern luxury and invites consumers to revel in a contemporary, design-forward lifestyle."

1 2

Known for its artful collaborations with both established and up-and-coming talents in contemporary design, Ligne Roset offers consumers an entire lifestyle in which to live both boldly and beautifully via its furniture collections and complimentary decorative accessories, lighting, rugs, textiles and occasional items.

An additional distinguishing point of difference that sets Ligne Roset apart from other manufacturers is its tradition of investing in dynamic designer collaborations. Matching its deeply-held belief in design with investment and technical innovation, Ligne Roset has grown from a small business to a multinational company with factories in France, headquarters in Briord, France and more than 200 exclusive Ligne Roset stores and 1,000 retail distributors worldwide. All the while, the company has been family-run since its inception in 1860.

Creativity is a key value of the Ligne Roset brand: if a new product demands new materials or productions methods, the company will simply acquire them. Seats, pieces of furniture, lighting, textiles, rugs or bed linens: the idea precedes and the technique follows.

"The remarkable setting in which the Roset Company is located reminds us daily of our duties as eco-citizens. We owe it the greatest respect."

1 2

Our philosophy

In the 1970's, when the ecological movement took off in France, the Roset Company was already practicing an environmental philosophy of simple good sense.

"For me, sustainable development begins with the pleasure we derive from working in such a remarkable location such as Briord, France. When one has the good fortune to grow and develop in an environment of such quality, one naturally wants to protect it," says Pierre Roset, President of Ligne Roset.

"As the Roset Company developed, we in fact generated less and less pollution due to our own vigilance, and by the demands we make on both our suppliers and ourselves,"

Today, Mr. Roset is involved at the highest level of the European Commission in his capacity as representative of Union Nationale des Industriels Fabricants pour l'Ameublement (UNIFA). The French furniture industry is deeply committed to sustainable development and has achieved a number of impressive results, including the classification of particleboard panels.
