## ABOUT US

Design.s – The International Biennial of Graphic Design Brno is linking thanks to its ideas and partly also in a practical way to a long lasting tradition of exhibitions which present works of students studying at Construction Institute VUT in Brno and at Faculty of Multimedia Communications in Zlín. These are regularly held in the place of Technical Museum in Brno.

The key stone of this exhibition is student design. The project dizajn.s should target the industry and product design above all, which is being created at universities in the Czech Republic and abroad.

The aim of this exhibition is to link to the traditions of Design Centre in Brno (1992-2007) and to present the town Brno as a town of design. Together with International Biennial of Graphic Design Brno organized by Moravian Gallery in Brno we want to attract professionals and lovers of design.

The project predicts an improving cooperation with universities which will be accompanied by specific outputs. We plan the involvement of new universities and broadening to an international rank.

The scope of the programme is not just the exhibition of student works but also professional meetings, seminars and workshops. The under product is to build a platform for education and a dialog with branch professionals.

There should be an output in a form of a publication – catalogue published to each exhibition presenting the best students Works or eventually a book of seminar Works.
