STENCIL GRAFFITI

what's

Stencil graffiti makes use of a paper, cardboard, or other media to create an image or text that is easily reproducible. The desired design is cut out of the selected medium and then the image is transferred to a surface through the use of spray paint or roll-on paint. The process of stencilling involves applying paint across a stencil to form an image on a surface below. Sometimes multiple layers of stencils are used on the same image to add colours or create the illusion of depth.

Those who make and apply stencils have many motivations. For some, it is an easy method to produce a political message. Many artists appreciate the publicity that their artwork can receive. And some just want their work to be seen. Since the stencil stays uniform throughout its use, it is easier for an artist to quickly replicate what could be a complicated piece at a very quick rate, when compared to other conventional tagging methods.

One of the best known graffiti artists who uses stencils extensively is Banksy.

LABELS

what's

Labels

A label is a piece of paper, polymer, cloth, metal, or other material affixed to a container or article, on which is printed a legend, information concerning the product, addresses, etc. A label may also be printed directly on the container or article.
