TOMAS JAROS RIVER IN CITY

The Architectural Design study programme focuses on creating interior and exterior space, their interaction, arrangement and organization. Students have to solve individual tasks in the form of specific assignments – exhibition displays, interiors, including design of individual pieces of furnishing, small-scale urban spaces, children's playgrounds, resting places, street furniture, colour design of shop floors and working areas. The individual tasks are based on real practice and long-term cooperation with the Chief Architect's Office of the City of Zlín.
